EXPERIENCE**FORDHAM UNIVERSITY**

New York, NY

Graduate Assistant, AI & Business Applications

September 2024 - Present

- Leveraged GenAI tools (ChatGPT, Claude, Perplexity) to analyze emerging technology trends, supporting strategic decision-making and ethical AI adoption across business functions
- Synthesized academic research and industry insights using AI-driven summarization to shape governance frameworks, promote responsible innovation, and guide cross-cultural business applications

MUFG SECURITIES AMERICAS INC

New York, NY

Assistant Vice President, eTrading & Digitization

August 2020 - August 2024

- Spearheaded market intelligence and competitive analysis, identifying 120+ client opportunities in US Treasuries and informing revenue strategy that drove a 27% market share increase; aligned sales insights with ideal customer profiles to sharpen go-to-market execution
- Built and maintained an enterprise-wide analytics dashboard covering Treasuries, Swaps, and CP, enabling sales, investment, and senior leadership teams to prioritize pipeline revenue and surface growth opportunities; powering real-time strategic forecasting and quarterly business reviews with Managing Directors
- Partnered with 15 cross-functional teams including Legal, Compliance, and Engineering to standardize vendor evaluations, reducing tech due diligence cycle by 40% through data-driven reporting and stakeholder consensus
- Collaborated closely with Investment, Tech, and Compliance teams to build relational data frameworks using Salesforce, ION Analytics, and SQL; strengthening partnership playbooks with standardized tagging and vendor evaluation models to drive GTM alignment and unlock cross-sell opportunities
- Co-developed proof-of-concept tools with engineering teams; translating business needs into product specifications to accelerate MVP development and enable cross-functional adoption

Consultant, Front Office Solutions

April 2019 - August 2020

- Led GTM enablement for front-office automation tools across 9 teams; driving adoption through live demos, compliance-focused redesigns, and user-centered trust principles
- Accelerated rollout of regulatory solutions by 50% through UAT ownership and executive training; authored standardized playbooks for scalable adoption
- Enhanced visibility and optimized workflows for 50+ live and pipeline deals by integrating Einstein Analytics into Salesforce; supported due diligence and strategic prioritization

GOLDMAN SACHS

New York, NY

Analyst, Regulatory Operations

July 2017 – March 2019

- Executed 10–12 daily strategic analysis initiatives across regulatory and operations pipelines, driving faster, data-informed compliance decisions
- Centralized technical requirements from 28 global teams to streamline product launches and cross-jurisdictional regulatory reporting
- Reduced reporting error rate through rigorous validation of 1,000+ trading system records; built dashboards adopted by senior compliance leaders
